Champaign County SFY17 Alcohol Consequence Data Report

Introduction

During SFY18, Champaign County was one of ten communities funded as part of Ohio’s Strategic Prevention Framework-Partnerships for Success (SPF-PFS) Initiative¹. As part of the SPF-PFS project needs assessment process, OSET worked with OhioMHAS and other partners across the state of Ohio to identify sources of data on alcohol consequences and to compile these data. This report provides alcohol consequence data for 2012-2016 and provides instructions on how to utilize and interpret these data.

Consequence Indicators, Years, and Sources

Secondary data on alcohol consequences were collected from several sources, which appear in Table 1. Proportions were calculated by dividing the number experiencing the consequence (or numerator) by the population size or a count of events (or denominator). This number is then sometimes multiplied by 100,000 if the resulting numbers are very small (e.g., 1 in 10,000 is .01%, but 10 per 100,000). Norming these numbers by the population size or number of events allows for the numbers for your county and the state to be compared.

Table 1. Consequence indicators, years, and sources.

	Denominator	Years	Source
Impaired Driving Indicators			
% Crashes Involving Alcohol	All crashes	2012-2016	Ohio Department of Public Safety. Ohio Traffic Crash Facts Annual Reports.
% Fatal Crashes Involving Alcohol	All fatal crashes		
% Injury Crashes Involving Alcohol	All injury crashes		
% Crashes Involving Alcohol (ages 15-24)	All crashes (ages 15-24)		
% Fatal Crashes Involving Alcohol (ages 15-24)	All injury crashes (ages 15-24)		
Alcohol-Related Arrests			
Alcohol Arrests per 100,000 Pop.	2010 population size	2012-2016	Ohio Incident-Based Reporting System
OVI Arrests per 100,000 Pop.	2010 population size		

The following figures provide data for your county and the state. Note that “#N/A” indicates that either the data were not available or the data were suppressed by the provider due to a small number of cases. You will want to consider both (1) whether your county changes over time and (2) whether your county differs substantially from the state proportion.

¹ Funding for the SPF-PFS is provided by the Substance Abuse and Mental Health Services Administration’s (SAMHSA) Center for Substance Abuse Prevention (CSAP); Funding Opportunity SP-14-004. The SPF-PFS in Ohio is administered by the Ohio Department of Mental Health and Addiction Services (OhioMHAS).
